ICT Troubleshooting Portfolio Case Studies

Prepared for portfolio purposes by Isaac. Proposed designs and illustrative scenarios are clearly distinguished from verified work experience.

Introduction

Illustrative troubleshooting methodology examples.

Case 1 Network Outage

Diagnose physical links, VLANs, routing and services.

Step	Action
Identify	Gather symptoms
Analyze	Review logs
Resolve	Restore link

Case 2 Printer Issue

Check connectivity, drivers and spooler.

Case 3 Login Problem

Review account state and identity services.

Case 4 Performance Issue

Assess CPU, RAM, startup load and malware.

Case 5 Quick Meat Packers

Illustrative weighing-record workflow.

Stage	Control
Capture weight	Validate reading
Entry	Double-check batch
Approval	Supervisor signoff

Escalation Matrix

When and how incidents are escalated.

Priority	Response
Critical	Immediate
Medium	Same day

Root Cause Analysis

5 Whys and evidence collection.

Preventive Controls

Monitoring, training and documentation.

Professional Note

These examples demonstrate capability, not verified historical incidents.
